ACOUSTIC BANNERS & BAFFLES

a premium acoustic product.

Baffles and banners offer reverberation control in rooms with sufficient height or where walls cannot be treated.

FABRIC BANNERS

Fabric banners come standard in white. We can use alternate fabrics laminated with a flow resistive layer to boost performance. A test of the proposed fabric is required to determine its suitability.

FABRIC BAFFLES

We are able to manufacture and supply a variety of baffles. These include a range of industrial and architectural finished baffles depending on the application.

RONDO & PLANO BAFFLES

Baffles allow large areas to be treated where access is limited.

Cables or T-bar systems can be used to support the baffles

Rondo Baffle: 150mm Dia. x 1200mm

Plano Baffle: 60mm by 1200mm by 50mm

Melamine foam products are available in white and light grey. We offer a custom colour finish option if required.

APPLICATIONS INCLUDE:

- > Manufacturing areas
- > Bottling Halls
- > Performing Arts Centres
- > Restaurants
- > Classrooms

We can offer custom engineered baffle solutions.
