SILENCERS & LOUVRES

for all applications

We are able to offer splitter and circular silencers for industrial and air-conditioning installations. We also have a range of acoustic louvers to meet your specification. The silencers or louvers can be manufactured in galvanized construction, stainless steel and finished in a range of colours for architectural applications.

BAFFLES

We offer a range of silencers and louvers. We have a standard range of tested configurations and can also design one off units and test prior to dispatch.

- > Acoustic louvers are available in a variety of thickness to suit a variety of performance levels.
- > Circular units offer moderate acoustic performance while allowing high volume flow rates with a relatively low pressure drop across the silencer.
- > Rectangular silencers are able to offer higher acoustic performance where required.

SILENCERS OFFERED

- > Steam discharge silencers
- > Rectangular Splitter Silencers
- > Circular silencers
- > Acoustic Louvers
- > Mufflers

We offer a range of acoustic foams, barrier, composites and vibrational damping materials. All of the above can be used to reduce machinery/engine noise depending on the noise problems

PROJECTS INCLUDE:-

- > Yunta Power Station Ventilation Silencers
- > 304SS Vacuum Discharge Silencer
- > FD Fan Intake Silencer
- > Roots Blower Silencers
